ERHARDT C CASSETTE AWNING

Shelter and support - the cassette construction

The mechanism of ERHARDT C-cassette awning is hidden inside the aluminum cover, it is in contrast to the conventional arm awning at which is visible. The cassette protects fabric and mechanical parts as a cover against wind and weather; it also makes the awning rigid and stable on the entire width. The ERHARDT C can supply a size of up to 6.5 m wide and 3.5 m projection.

Three frame colors - one price

The ERHARDT C-cassette awning is standard in RAL 9010, silver RAL 9006 and charcoal DB 703. Also available on request in any other RAL color.

Perfection in form and material

ERHARDT C components are made of extruded aluminum with powder coating, included cover and folding arm joints, nuts and bolts in V2A stainless steel quality.

Articulated arms for maximum loads

Ensure a stable mechanism in the arm joint with special stainless steel plated link chain, high stability and extreme durability.
