ERHARDT WG - THE ORIGINAL FORM BEAUTIFUL SUN PROTECTION WITH MORE BENEFITS

DESPITE COLD SUN AND HEAT

Direct sunlight heats unprotected winter gardens and makes any stay in the shortest time possible. The ERHARDT WG blocks the sun, before the air can warm up the winter garden. Remains pleasant climate obtained.

The robust front rail has an integrated rain gutter with controlled drainage.

PROTECTION FOR TECHNOLOGY AND FABRIC AWNINGS

The "ERHARDT WG" is designed for side-hipped conservatories. Of course it is also easy installation for all common "winter garden and terrace roofs, for example, in combination with the "T ERHARDT terrace roof." Cloth with Roller tube and drive are hidden in the stable cassette awnings that best protects against the weather. The integrated tuning elements in the guide rails ensure stable support and precise guidance.

NO SIDE RAILS, OPTIMAL SHADING OF SPECIAL AREAS

When ERHARDT WG conservatory awning no side rails are required, principally allows for special areas are shaded to about 120 cm width beyond the conservatory.

NICE SHAPE DESIGN COMBINED WITH HIGH-TECHNOLOGY

The conservatory awning "ERHARDT WG" stands out with the soft and trend-setting look of the cassette awnings. The extruded aluminum profiles and all related elements in V2A stainless ensure the highest quality strength, quality and durability.

In line mounting of two or more individual plants, a fabric gap between the individual plants is about 8cm.

EASE OF USE WITH MOTOR

The ERHARDT WG comes with a quiet electric motor with electronic limit as standard. For added convenience, there are optional motor with the radio transmitter.

COLOR SELECTION

In addition to the standard colors charcoal, white, and white aluminum (silver), the awning frame on request be delivered in any other color.

! Note: From a plant width of 500 cm and 300 cm loss can occur when extending to a contact between fabric and guide rail.
