## ERHARDT terrace roofs – The freedom of ideas

ERHARDT terrace roofs are offered with two different spar dimensions. As a consequence, all customary sizes and nearly all special designs can be realised. No additional support is required up to a post spacing of nearly 7 metres. This makes ERHARDT terrace roofs appear very graceful and delicate even in smaller-dimensioned applications. With three basic colours or a custom RAL colour, your individual terrace roof solution quickly becomes an architectural eye catcher. There are two basic versions:

**T100 (spar height, 100 mm):** graceful and design-oriented with a depth of up to 350 cm.

**T150 (spar height, 150 mm):** stable and snow proof with a depth of up to 600 cm.

## Transform your terrace into a garden room

A great advantage offered by ERHARDT terrace roofs is flexibility with a large selection of additional accessories. ERHARDT terrace roofs can be supplemented by glass and sliding elements in any number of ways with no time constraints. The range includes fixed elements of glass or screening elements combining glass and aluminium which ensure ideal wind and weather protection. The glass sliding elements which also allow barrier-free mounting make a good impression with their elegant appearance and smooth operation on high-quality ball bearings. Operating elements with a stainless steel optic are included as standard. Both LED lighting elements and dimmable lighting rails can be integrated professionally.

## Comfortable, convenient living

Easy-to-operate remote controls allow any terrace to be lighted conveniently as desired. The infrared heating elements create a comfortable atmosphere in mere seconds even on cool evenings. The integrated LED lighting elements and the infrared heating elements require little energy and provide true added value for many years. This lets you extend your outdoor season not only on rainy summer days, but also in spring and autumn.

### Timeless, elegant and versatile

The terrace roof can be mounted on any facade and adapted optically to match. The high-quality construction of glass and aluminium ensures longevity and is easy to care for. With its timeless design, an ERHARDT terrace roof still looks modern and fresh even after many years.
